Story:-

The Story is about the description and basic flow of Shopping List Notification.

Story Board

Shopping List Notification

STORY BOARD

We have 2 modules
1) Admin Module
2) User Module

In Admin Module admin can login using ID and password.

After Login Admin have 3 choices
1) Add Product
2) Update Price of Product
3) View List of All Products

After login admin can logout or exit from the system

In user module user can login using user ID and password

After login user have 3 choices:
1) See product list
2) Subscribe product
3) View notifications

After login user can logout or exit from the system.

Once if the price of the product subscribed by a particular user has changed he will get a notification redarding that. The same can be viewed in the notification option.
